In addition to seeing youth in our two clinic locations, we provide services through Minneapolis. Our school-based mental health program serves as a model for linking school systems to community mental health services. This unique collaboration is the foundation of our services, which are designed to support and enhance education outcomes for students at risk. We partner with Minneapolis Public Schools and Hennepin County to operate mental health clinics at 12 locations in South and North Minneapolis in the following schools:

- Andersen United Community School
- Anne Sullivan Communication Center
- Bancroft Elementary School
- Cityview Community School
- Emerson Spanish Immersion School
- Keewaydin Elementary School
- Loring Community School
- Lyndale Community School
- Sanford Middle School
- South High School
- Wellstone International High School
- Whittier International Elementary School
